

Chapter 13

How Compatible Are YOU with YOU?

Unlike in Chapters 7-11 (on pages 111, 119, 122, 126 and 132), in this chapter, the focus is not on diluted vs concentrated signs.

Here, we are looking at your sun, moon and rising sign, *however*, you can use either the diluted side of your sun, moon and rising OR the concentrated side of your sun, moon & rising. Because regardless the side, it is all a *balanced* part of your personological makeup. (Turn back to page 136 and re-read the bold print). That is the reason why on pages 108-133 (chapters 7-11, pages 111, 119, 122, 126, and 132); no matter the diluted or concentrated sun sign, diluted or concentrated moon sign, or the diluted or concentrated rising sign; it is balanced with a totality of 6-that is: 3 diluted + 3 concentrated signs. That totality is a total 3 thinking signs + 3 feeling signs (as explained back on page 136 in the bold print).

As explained in pages 96-104, “Planets” in the constellation are representative of the characteristics imbedded within each human being on earth-our “community.” Positive [and particularly of negative] within our own earthly community, we tend to form opinions and beliefs about each other without personally knowing one another. Ignorance (to not know/have knowledge of or about) breeds prejudice. This “prejudice” creates blocked energy, which in turn, creates conflict-as long as we remain “ignorant” about one another here on earth.

Astrologically and personologically speaking, unfortunately, this blocked energy can never become unblocked. Because your astrological chart simply is what it is (and can’t be changed).

I’ll explain:

Because there is a sun, moon *and* rising sign within your astrological makeup, it is quite possible that all constellations within you (your sun + moon + rising signs) may not be “harmonious.” That is why it is very important to know what your sun, moon *and* rising signs are-so that you are able to work with *yourself*-to help you understand the reason(s) for this blocked energy that create: strain, turbulence or disharmony.

On the other side of that though, there *are* some people with harmonious sun sign + moon sign + rising signs.

If your sun, moon and rising signs *are* harmonious, you still need to know what to do to maintain this harmony-as all relationships (no matter how harmonious), require maintenance in order to work. It’s no different than the work it takes to lessen disharmony, turbulence or strain.

There is nothing we can do to change the placements of the planets and constellations in the heavens anymore than we can change their placement during our birth (from whence our natal birth charts are derived). The only thing we can do is study, learn and know them so that we can see what place they have in our lives, and from there; work with and respect it-simple as that.

As we already know, the heavens rotate but even when they do, they still remain certain degrees apart, which too, is a contributor to the reason for harmony, strain or turbulence here on earth (between us and within ourselves).

Learning the placement of your planet (Mercury, Venus, Mars, Jupiter, Saturn, Uranus, Neptune or Pluto) within your constellation (Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius or Pisces) is especially important to know about if they are placed at a turbulent/strenuous/disharmonious degree. Why? Because it is your (sun + moon + rising) chart = you (astrologically/personologically).

As explained in the prologue, there are things that separate us: geography, race, color, religion, nationality, etc. Sometimes, these “degrees of separation” apart can make us “ignorant” to that which is not “like” us. And as a result, how we relate to one another can be harmonious or disharmonious. In the heavens, planets and constellations are “degrees apart” like that (just the same).

Our birth chart is a result of how we fell into their placement at the time, day and year of our birth. Have you ever heard the quote: “anything born at a particular moment in time will have the qualities of that moment in time?” That’s basically what “astrology” is. It’s an intuitive science of study about a moment in time that you and I “fit” into. The science and study of it super cedes us. But per our placement (planets & constellations) it is believed that some aspects of our personality are like that of the science. Obviously other factors such as our environment, the way we were raised, our social class/socio-economic persons etc., play a part in who we are as persons, but it is believed that astrology (and our placement in it) does as well-factors as such as reasons why we are harmonious or disharmonious.

With regard to this “Self-Compatibility” chapter, I will show you where your: sun+ moon + rising sign’s are harmonious or disharmonious. Just like in life where there is disharmony, there are steps we can take to bring about some semblance of harmony by being who we are, changing who we are, or adding light or positivity places where disharmony, dark or negative resides.

So, in this chapter, where disharmony is within the combination of your sun + moon + rising sign; you may refer back to Chapter 3/page 82-91 to see the light side and dark side characteristics for your sun sign, your moon sign *and* your rising sign.

Also, (on page VII) in reviewing Table of Content’s chapters 7, 8, 9, 10, 11 12; you can clearly see reasons why (or why not) your sun + moon + rising sign are harmonious. Because of *Water + Earth -vs. Air + Fire | Masculine -vs. Feminine | Dynamic -vs. Strategic | Positive -vs. Negative | Abstract/Extroverted/Odd -vs. Concrete/ Introvert/Even | Subject Feelers -vs. Objective Thinkers.*

...It’s all right there under that part of the Table of Contents.

Carefully review which signs fall and fit into each, and you will fully understand why the harmony or disharmony with of your sun + moon + rising sign where your (astrological) “Self-Compatibility” is concerned.

Have fun:
