

Methodology: The Astrological Algorithm for Discovering Your Destiny: Your Karma Mission and Purpose in Life

As explained in the last three paragraphs in the section: “Simple Methodology: Making Logical Sense of Intuitive Astrology,”, we are born with the natural ability, talent or skill to do one of three things exceptionally: LEAD (be cardinal), ORGANIZE (be fixers) or COMMUNICATE (be mutable). And in doing so, our fellow man will (consciously or unconsciously) be inspired, motivated, ennobled, or encouraged to find theirs. Astrology’s perfected order that divide the twelve signs of the zodiac, also separates them into those categories of Leaders, Organizers and Communicators, by way of what I refer to as their light and dark side characteristics (as elaborated on in Chapter 3 of the this book-pages 82-91) and their planetary characteristics (as elaborated on in Chapter 5 of this book-pages 96-104). This is where the years of being bombarded with adjectives describing what a particular sign’s personality characteristics are become useful for something. For years, no other astrology book could make sense of why I needed to know this-hence, why I wrote my own astrology book-to explain why those sign’s personality characteristics are worth knowing about (and make it not only make sense to you, but to show you just “how” it can be *useful* to you, as well). Who cares that Cancer is usually a homebody, great parent, moody, thrifty, security conscious, intuitive, psychic, emotional, sensitive and domestic? We’ve read that in practically every astrology book written. It’s time to know “why” and “how” those personality characteristics can be useful virtues, or crippling vices.

As previously stated, all 12 signs of the zodiac have a karmic mission/function to lead (be cardinal), organize (be fixers) or communicate (be mutable):

| LEADERS | ORGANIZERS | COMMUNICATORS |
|-----------|------------|---------------|
| Aries | Taurus | Gemini |
| Libra | Scorpio | Sagittarius |
| Capricorn | Aquarius | Pisces |
| Cancer | Leo | Virgo |

Characteristics (as elaborated on in Chapter 3 of the this book-pages 82-91, and Chapter 5 pages 96-104) can be separated into virtues or vices per zodiac sign (as demonstrated in those chapters). Those characteristics are more than useful in [the usual] explanation of determining ones astrological compatibility with another person of another astrological sign. They are also useful in helping you to determine what fields of study and occupations best suit you, as per the light & dark characteristics, as shown on those pages 82-91 & 96-104. (At the end of the book in the “Discovering Your Karma Mission and Purpose in Life” chapter, pages 184-200, I will list a generous amount of these fields and occupations per sign in which-by way of your rising sign-if you are making a life or a living by doing; your natural talents, skills and abilities enable you to do them-exceptionally). The reason why this is important and beneficial to you, is

because in our karmic mission to lead, organize or communicate, we are either doing it by:

- Free will
- Default
- **Destiny**

As previously mentioned, this book's focus is centered around "purpose in life" as pre-determined and in accordance with your birth placement's order that *you* fell in to (at birth). Destiny's purpose in life is *not* by way of free will, nor is it by default. **My logical, astrological methodology lead me to the belief that destiny's karma mission and purpose in life can be found by way of your Rising sign only.**

How is this so? I'll explain:

We all have a: Sun sign, Moon sign, and a Rising/Ascendant sign (which I include charts for within this book, to help you find: page 28-your Sun sign, pages 30-77-your Moon sign and page 78-your Rising/Ascendant sign).

Our Sun sign is first=Ego.

Our Moon sign is second=Id.

Our Rising sign is third=Spirit/Transcendent.

*(From there, in astrology, we do have a: Mercury sign, Venus sign, Mars sign, Jupiter sign, Saturn sign, Uranus sign, Neptune sign and Pluto sign. Like my showing you how to find your Sun, Moon and Rising sign; there are charts to find out what constellation was located at what planet during your time, date, and month of your birth. **In this entire book however, we are keeping the focus on just your Sun sign, Moon sign and Rising signs**).* After we help you find out your Sun, Moon and Rising Signs, we focus on the zodiac sign opposite your Sun sign, Moon sign and Rising sign. We will elaborate on the reason why in Chapter 13's (7-7) Pattern of Opposition on pages 154-156. But here is the short answer as to why:

By way of the methodology I accidentally discovered (as true for me), my Rising sign is Virgo. Opposite Virgo is Pisces. Both, Virgo and Pisces are Mutable signs whose karma mission is life is to Communicate. There are several ways to communicate, but as explained previously: we are all gifted with the *exceptional* ability, talent or skill to lead, organize or communicate some thing that our fellow man will be in receipt of (subconsciously or consciously). Whatever it is, it shall motivate, inspire, ennoble or encourage him to find and learn his.

My karmic mission and purpose in life (as found through my Rising sign of Virgo) opposite it: Pisces, both-whose missions in life are to communicate/be mutable, happens to be by way of conversation. I am an effective, vibrating and vibrant conversationalist. But moreover, an exceptional writer-which happens to be a talent, skill, ability that comes naturally to me. As a result, it is my belief that it is my karmic mission in life to communicate (via writing) and this book is such that I am communicating to you-in hopes that you too, will find yours...
